

Undergraduate/Graduate Research Assistantship Available at CAL

The Computer Architecture Lab (CAL) has research assistantship positions **immediately available** for undergraduate/graduate students in the Department of Computer Science at Lamar University.

Salary: A competitive stipend.

Available: Spring, summer, and/or fall.

Responsibilities: The research assistants will work on system architecture design for multicore processors.

Required experience: A strong background in C/C++ programming and some experience with the Unix/Linux operating system.

Additional experience preferred:

Familiarity with Computer Organization/Architecture and database programming is a plus. An interest in Computer Architecture is desired.

You are suggested to take the course, **Advanced Computer Architecture**, to gain knowledge in system design.

Application: Contact Dr. Jane Liu at liu@cs.lamar.edu
